USAN (BC-125)                      AGLATIMAGENE BESADENOVEC

PRONUNCIATION                      a'' gla tim' a jeen be'' sa den' oh vek

THERAPEUTIC CLAIM                      Antineoplastic

CHEMICAL DESCRIPTION

AdV-tk is an immune stimulating, replication-defective, adenoviral vector expressing Herpes simplex virus thymidine kinase (HSV-tk) gene. AdV-tk is based on the dl309 serotype 5 adenovirus with a deletion in the E1 region of the adenoviral genome rendering it incapable of replicating except in specialized laboratory cells that complement the deleted genes.

TRADEMARKS                      ProstAtak™, Virafir™, GliAtak™, PancAtak™, OncAtak™, CanAtak™

SPONSOR                      Advantagene, Inc.

CODE DESIGNATIONS                      AdV-tk

CAS REGISTRY NUMBER                      1621271-62-2

UNII                      5Z72SSS34W

WHO NUMBER                      10120
