

STATEMENT ON A NONPROPRIETARY NAME ADOPTED BY THE USAN COUNCIL

USAN	ONACLOSTOX
PRONUNCIATION	on" a klos' tox
THERAPEUTIC CLAIM	Treatment of blepharospasm, strabismus, cervical dystonia, severe primary axillary hyperhidrosis, and palmar hyperhidrosis.

RESCINDED

CHEMICAL NAMES

1. Botulin A
2. botulinum neurotoxin type A (EC 3.4.24.69) from *Clostridium botulinum*
3. *Clostridium botulinum* Type A-1 neurotoxin complex (Allergan strain-900 kDa)

STRUCTURAL FORMULA

The 900 kDa neurotoxin complex is composed of several subunit proteins. These proteins (in their non-reduced forms) exist as the 150 kDa neurotoxin, a 130 kDa non-toxic non-hemagglutinating protein, and hemagglutinin proteins of 14, 19, 22, 29, 33, 45 and 48 kDa molecular weights as determined by gel electrophoresis assay.

MOLECULAR FORMULA	Not applicable
MOLECULAR WEIGHT	900 kDa
TRADEMARK	BOTOX®/BOTOX® Cosmetic
MANUFACTURER	Allergan
<u>CAS</u> REGISTRY NUMBER	93384-43-1

- NOTES:
- 1) The name onaclostox has been rescinded.
 - 2) Please see adoption statement for onabotulinumtoxinA (N09/27).
